WORK EXPERIENCE

Simulator Technician

L3 Communications, Arlington, TX

2008 - 2014

As a technician, I was a member of an installation team for complex flight simulator pilot training systems for advanced tactical aircraft and supported all phases of system installations. I developed strong skills applicable to any job, including meeting deadlines, maintaining clear communication with teammates and management, paying strict attention to detail, managing my time well, and being accountable for results. Experience with assembly, configuration, and troubleshooting of technical equipment.

Electro-mechanical Technician

Qualigen Inc., Carlsbad, CA

2007 - 2008

I worked as a technician building sophisticated medical equipment. Some of my responsibilities included working hand-in-hand with engineers to help develop new products, working with quality control to meet strict build specifications, and working in a team environment to ensure deadlines and quotas were met.

Diesel Mechanic

U.S. Marine Corps

2003 - 2007

As a Marine I learned to work as part of a team to accomplish any mission, gained leadership skills, gained discipline, including time management skills-imperative in become a successful Marine. I was promoted to Sergeant in less than 3 years making me the youngest in my entire unit. As a diesel mechanic, my responsibilities included repairing vehicles to ensure combat readiness, maintaining vehicle service schedules, being accountable for equipment, and serving as the lead mechanic for countless "outside the wire" missions in Iraq.
